Professional Summary:

Over the course of my career in software engineering, I have fine-tuned my abilities in developing **full-stack web applications** while taking roles that required adaptability – *which shapes modern development*, problem-solving, and innovation. During these experiences, I developed solid understanding of **software architecture design, CI/CD, server configuration, Infrastructure as Code – IaC, and deployments**; allowing me to contribute meaningfully to projects I undertake. Right now, I'm focused on continuous professional growth and taking on roles that challenges and inspire me to be better in my craft. With my resilience and solution-driven approach to my work endeavors, I gravitate towards a future where I not only contribute to great projects, but also build and lead high-impact projects that drive meaningful change and innovation.

Skills:

Web Development: *JavaScript, TypeScript, Go, Python, React.js, Next.js, Node.js, CSS3, Tailwind CSS*

Database: *SQL, MySQL, MongoDB, DynamoDB*

Deployment: *AWS, Docker, Nginx, GitHub*

IaC Platforms: *Pulumi, SST*

Others: *Bash scripting*

Certification:

AWS Solutions Architect Associate – SAA

CS50's Introduction to Programming with Python

CS50's Introduction to Databases with SQL

Experience:

Full-Stack Software Engineer

Aiddify | 2024 – Present

Aiddify is a fundraising service that enables people to support each other through goodwill monetary donations.

I was responsible for:

- i. Building the landing pages and user interfaces
- ii. Implementing APIs and server-side logic including user authentication and authorization
- iii. Designing databases and optimizing queries, I configure CI/CD pipelines for automated testing and deployment

Full-Stack Developer

The Grand Awards | Project-based contract 2019, 2023

The Grand Awards is a subsidiary of *360 Grand TV* – a dance media company that recognizes and award Nigerian dancers for their hard work and dedication in promoting the Nigerian dance culture.

I was responsible for:

- i. Creating design system, I implemented voting mechanism for the award nominees

Frontend Developer

Mikuch Global Limited | 2022 – June 2023

Mikuch Global is a real-estate firm that's provides services in areas of engineering, procurement and construction.

I was responsible for:

- i. Building user interfaces
- ii. Optimizing web performance and accessibility

Notable Projects:

Aiddify Application

Aiddify is a crowdfunding service designed to facilitate goodwill monetary donations, enabling individuals to support each other. This system operates as a peer-to-peer fundraising service, allowing users to create campaigns, share their stories, and receive financial assistance from donors.

My Portfolio Website

My personal website also featured a blog.

Oyola Crypto Market

Oyola is a P2P marketplace created for easy conversion of crypto assets on an easy, fast and secure way. BTC, USDT, BNB, and ETH are supported based on real time market updates.

Hobbies:

I enjoy expanding my knowledge, pushing my limits in the gym, and cycling.
